HTML Training Syllabus

CSS Training

Without CSS knowledge no one can able to design professional web layouts. CSS part is going to help the web designer in defining the styles of each HTML Tags. There are many types in CSS. Our Web Designing Training in Chennai will discover all the aspects in CSS Zone.

CSS Training Syllabus

PHP Training

After getting enough knowledge in static designs we started to train the students in dynamic languages. We chose PHP and MySQL for that. Reason for that is simple. PHP is the most powerful front end dynamic language in this world. So, by using PHP Training our students convert the static designs into dynamic websites.

PHP Training Syllabus

MySQL Training

MySQL is a perfect open source RDBMS which will use by most web applications. Our Web Designing Training in Chennai combined both PHP and MySQL® in static students to work with MySQL to build a custom CMS.

MySQL Training Syllabus

JavaScript Training

There is no introduction needed for JavaScript. JavaScript® this Web Designing classes. JavaScript is going to help in various ways in real-world projects. In validation areas and client interaction areas there is no other replacement language than JavaScript®.
